

GRAPHIC DESIGNER *and* FRONT-END DEVELOPER *in* ROCK HILL. WEEKEND CUSTOM TYPOGRAPHER *and* ILLUSTRATOR.

FUTURE PLANS

To pursue a career as a designer and/or front-end developer. Interested in creating well-made, user-friendly websites. Plan to maintain and improve the quality of the company at which I work. Providing innovation in design and using the most current as well as timeless solutions. To promote the importance of economically written and simply readable mark-up, organized CSS, hand-coded HTML, and overall clean, multi browser-compatible code.

EDUCATION

BFA Visual Communication Design - Graphic Design, Winthrop University **MAY 2010**

SKILLS

I'm a wizard with Adobe Illustrator, Photoshop, InDesign, HTML, and CSS. I know a bit of PHP, Javascript, and have Flash experience. Great with team leadership, concept development, and brand creation. Optimizing for search engines (SEO) is a breeze. Finessing curves with the pen tool and laboring away at hand drawn illustration is really gratifying. If all that doesn't convince you, I promise I have unwavering, stay-up-all-night dedication, a relentless obsession with aesthetics, and an incessant desire to be organized.

EMPLOYMENT
